

Campbell River

British Columbia

Fast Facts

Population: 35,000

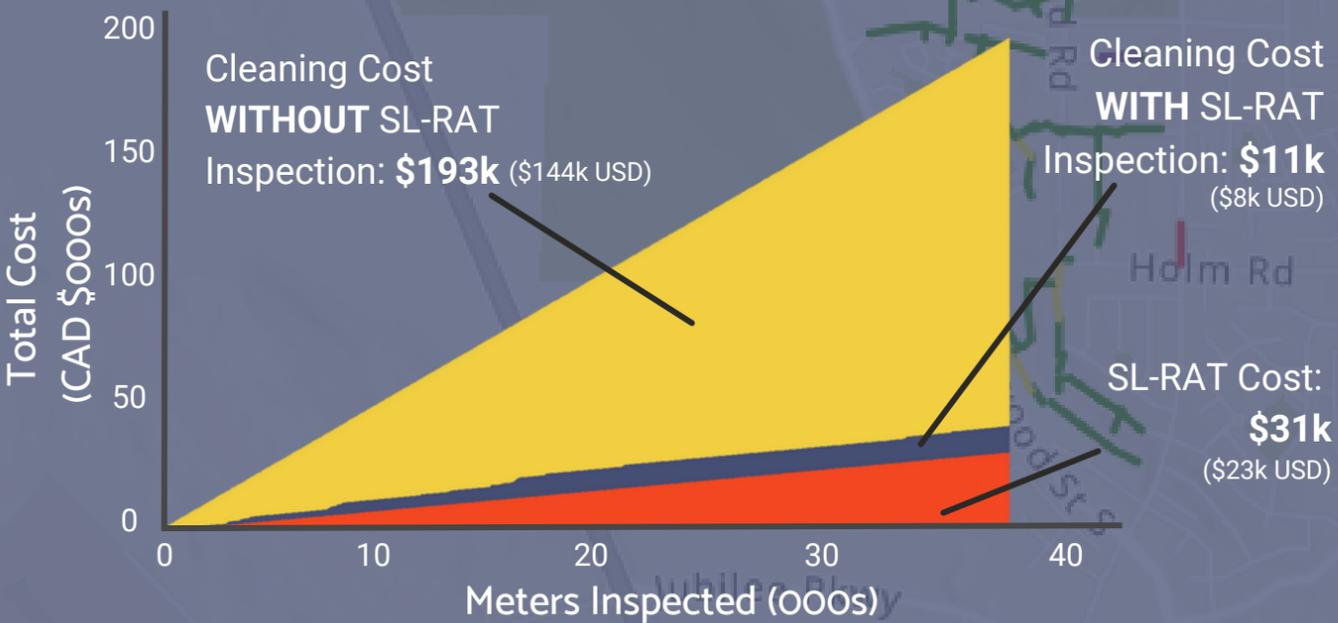

Kilometers of Sewer: 260

Meters Inspected: 37,000

System Health Recap

Netting Over C\$151K in Savings

"The SL-RAT has been extremely helpful for evaluating pipes located in areas that our CCTV trucks cannot reach. The SL-RAT assisted us to identify and quickly repair the issues found. Having a low-cost method to inspect these pipes enables us to keep our collection system proactively free from blockages."
